Size that matters and quality

The RG-200 is designed to suit the kitchen with smaller volumes but needs the quality and power of a large professional vegetable preparation machine. The size makes the machine suitable to use directly on a kitchen workbench.

Ergonomics and safety at all levels

Thanks to the automatic start and stop function the machine stops as soon as the pusher plate is swung aside. When it is swung back the machine restarts and you can continue working. If the feed cylinder is removed the power is cut. The RG-200 also has a full moon cylinder that can hold larger quantities and whole products. Features like these are a clear advantage, particularly when larger volumes are involved.

The leaning design means that the feed cylinder is always positioned at the right angle making it easy to top up. It does not take up a lot of space in the kitchen. You can use it as a table top machine. And it is easy to move, something which is helped by the generously sized handle on the back.

Accessories that simplify life in your kitchen

• Angle Cut Feed Head

Used for slicing long and narrow vegetables such as cucumbers, carrots and leeks to get angled decorative slices for wok dishes, sandwiches, salads etc.

• Pipe insert incl. Pestle

Used for continuous feeding of long and thin vegetables that are to be cut "standing", for example spring onion, chilli and radish. The pipe insert is placed in the inbuilt tube feeder.

• Machine table for a better ergonomomy

The table can be set at three different heights (high, medium, low) so that correct ergonomic posture is always guaranteed. The design of the table allows easy accommodation of HALLDE's Container Trolley.

• Container Trolley for a smooth flow

Facilitates the handling of cut products, transporting them easily to subsequent stages of the preparation process. Can be adjusted to different heights and even folded up completely. The trolley is made entirely of stainless steel, with four sturdy wheels, two of which are lockable.

• Cleaning brushes in two sizes

Used for cleaning machines and cutting tools. Both have coarse bristles that are particularly effective for cleaning Dicing Grids and Julienne Cutters.

• Wall rack for Cutting Tools

Provides space for three cutting tools and a quick overview of the entire range, saving space and making handling safe and comfortable – an effective way of protecting the edges of the blades from unnecessary wear.

Easy cleaning for the best hygiene

For quick cleaning, all loose parts are simple to remove for easy rinsing of the machine. The feed cylinder is removable and can be cleaned under running water.

The RG-200 is manufactured solely from hygiene certified material. The machine has smooth surfaces, rounded edges and has no unnecessary recesses where food might penetrate and get stuck.

Highest possible reliability

The powerful motor has a high starting and running torque and powers the direct-driven cutting tool. This makes the RG-200 an exceptionally reliable machine – irrespective of the products you are preparing.

Cutting tools with complete register

Our wide range of Ø185 mm cutting tools means the RG-200 can handle every conceivable task. The RG-200 slices, dices, shreds, grates, cuts juliennes and crimping slices – everything from firm to soft products. The knife blades and grating plates are replaceable so you can easily maintain a sharp edge on the cutting tools.

Always perfect cutting results

The rotation speed of the cutting tools is optimised for cutting fine and even slices as efficiently as possible. The knife blades are purposefully sharpened to keep a sharp edge for as long as possible.
